

FOR IMMEDIATE RELEASE

Opti9 Named 2024 VCSP Partner of the Year in the Americas region by Veeam

Ottawa, ON, Canada - April 22, 2025: Opti9 proudly announces it has been selected as the 2024 Veeam Cloud & Service Provider of the Year, Canada in the Americas region by [Veeam® Software](#), the #1 leader by market share in Data Resilience. These awards celebrate the remarkable achievements and dedication of partners within our Veeam ProPartner Network who have gone above and beyond in demonstrating outstanding performance, innovation, and commitment to delivering exceptional solutions and support to our customers.

Opti9 was recognized as Veeam Cloud & Service Provider of the Year, Canada. The partner who demonstrates the best overall performance in areas of revenue (consistently growing, but not necessarily the highest revenue amount), collaboration with Veeam and proactive selling and promoting of Veeam solutions and adjacent technologies in Canada.

“At Veeam, being a channel-first company means our partners are at the heart of everything we do, and these winners represent the gold standard,” said Kevin Rooney, Vice President of Americas Channel at Veeam. “Today, the stakes couldn’t be higher – close to 70% of organizations still suffered a cyber-attack last year – the combination of Veeam’s industry-leading innovation with our partners’ expertise and passion delivers data resilience to our customers to ensure their business keeps running no matter what happens.”

About Opti9 Opti9 is a nationally recognized leader in technology consulting, drives digital transformation with services spanning data storage, DevOps, backup and recovery, and compliance-driven migration. Our business-first approach, backed by hybrid cloud certified specialists, supports businesses in achieving desired outcomes through innovative solutions. Opti9 has positioned itself as a trusted customer-centric provider. We architect and deliver secure, efficient cloud solutions, enabling businesses to harness the full benefits of the cloud. Opti9 is headquartered in North America, with data centers around the world. Right Workload. Right Cloud. Right Time.
